## TK100 Touch Kiosk

## Queue Management

Companies, institutions and retail stores customer-oriented, often face the problem of long queues and unpredictable waiting time that cause tension and stress among employees and customers and that result in an efficiency decreased.

The solution is a Queue Management System, enabling more efficient and professional treatment to the customer. Instead of standing in long waiting lines, customers can sit a little bit and receive some useful information about the company's services through digital signage and corporate television systems.

Any company or institution, customer oriented, such as banks, government agencies, hospitals and clinics, pharmacies, post offices, telecommunication companies, hypermarkets, shopping services to citizens, etc... will improve their services and increase the image of the institution.

The Queue management software optimizes the waiting time for customers, and above all organize and manage the customers call in an efficient, fast and simple for any developer or business entity.

WAITING TIME

The main objective of service management is the ordering of the queues in order to improve the quality of services provided.
